OVERHEAD PRIMARY TAPS HOT LINE TAP CLAMPS ALUMINUM

ALUMINUM
AH/S1500

- For Aluminum and ACSR conductor.
- Designed for standard "hot stick" application.

Material: **Body and Keeper** - Aluminum Alloy
Eyebolt - Bronze Alloy - Tin Plated
Eyestem - Bronze Alloy, Forged or Stainless Steel
Spring (on eyestem) - Stainless Steel

For Factory greased and bagged clamps, see notes below table.

+ Aluminum/Copper bimetallic washer in eyebolt.

OVERHEAD PRIMARY TAPS HOT LINE CONNECTORS ALUMINUM

ALUMINUM
GA100

For Aluminum and ACSR conductor.

Designed for standard "hot stick" application.

- May be used for all standard hot line tap connections as well as full duty connections involving major line equipment and apparatus or main to main line joints
- Can be used for bimetal connections (Aluminum run to copper tap) with standard Fargolene inhibitor

Material: **Body and Keeper** - Aluminum Alloy
Spacer - Pure Soft Aluminum
Eyestem - Aluminum Alloy, Forged
Spring (on eyestem) - Stainless Steel Belleville

*All "AC" clamps have a bimetal spacer on tap bolt. For use with copper tap conductor.

**RUS Listed

OVERHEAD PRIMARY TAPS HOT LINE TAP CLAMPS HOT LINE TAPS FOR MOUNTING CURRENT LIMITING FUSES ALUMINUM

ALUM/BRONZE
GH200A

GH201 Series Hot Line Taps are specially designed to mount current limiting fuses directly on the line conductor eliminating the need for increased pole height to maintain adequate clearances.

- Fuse replacement can be readily accomplished using standard hot stick techniques
- Accommodates either spade or pin terminals of current limiting fuses as well as conventional solid or stranded tap conductors
- Tap position is located to provide adequate room for installation tools as well as vertical fuse alignment. Permanent contact pressure is maintained by the use of a heavy duty stainless steel Belleville spring. Long "duck-bill" provides a guide for easy initial contact with run conductor
- Forged eyebolts provide consistent strength and uniform expansion under loading conditions

Material: Body and Keeper 201 – Bronze
 Body and Keeper 201A – Aluminum Alloy
 Eyebolt – Bronze – Tin Plated
 Eystem – Bronze Alloy, Forged
 Spring (on eystem) – Stainless Steel Belleville

Note: Add "L" su x for factory loaded inhibitor in main conductor groove, ex. GH201AL
 Add "LBE" su x for factory loaded inhibitor in main conductor and tap eyebolt, ex GH201ALBE

GH282, GH284 AND GH286 (COPPER)

J3LS2 (Bronze)

STIRRUP POSTS

Fargo stirrups are designed for ease of attachment of hot line taps or bypass clamps on various system components.

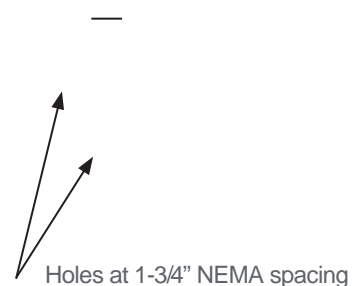

The use of stirrups protect the run conductor, and provide positive contact for hot line taps, recloser connections, and "pig tails."

These stirrups are applied on products such as cut-outs, riser pole disconnect switches and pad mounted switch gear and temporary-only for maintenance purposes, not for safety grounding applications.

Cast from high strength aluminum or bronze the stirrup rod readily accepts standard hot line connectors or ground clamps. The shoulder "button" on the end prevents the clamps or connectors from slipping off during installation.

Where applicable, stirrup holes permit application on spades or terminals with Standard NEMA Spacing.

For Tin-Plated Bronze Stirrups add Su x "P."

Holes at 1-3/4" NEMA spacing

Not designed for Fault Current

* For 5.25" post length add 525 su x

OVERHEAD PRIMARY TAPS HOT LINE TAP CLAMPS BRONZE

BRONZE
BC/BH

For Copper conductor.

Designed for standard "hot stick" application.

Material: **Body and Keeper** – BC/BH—Brass Alloy
BC/BH—FTP—Brass Alloy
— Tin Plated

Eyebolt – Bronze Alloy

Eyestem – Bronze Alloy or Stainless Steel

Washer – BH—Silicon Bronze

BC/BH—FTP—Stainless Steel

FIGURE 1 FIGURE 1A FIGURE 2 FIGURE 3

1. BC20LD has a longer "DUCKBILL" for easier attachment to a stirrup bail or conductor.
2. For connector with inhibitor in main jaw and plastic bag, add su x "XB" to catalog number.

OVERHEAD PRIMARY TAPS LIGHTNING ARRESTER ACCESSORIES ALUMINUM AND BRONZE

ALUM/BRONZE
GH200/GO370

The arrester line connectors allow installation of lightning arrester directly on the line, which conserves pole space and the cost of mounting hardware.

- GH201D (bronze) and GH202AD (aluminum) versions are designed to accommodate the stud of the arrester in the rear extension of the connector.
- GO370 series Bronze Arrester Connectors thread onto the stud of an arrester. Side loading feature provides flexibility in application. Hot stick feature allows for change out of an arrester without interruption of service.
- This connector is intended primarily for bottom termination of lightning arresters to ground. May also be employed on top connections.
- GS580 Wildlife Protector is designed to be mounted on the top of a lightning arrester, and accommodates any of the GO370 series arrester connections. Hinged design allows easy access to connector. Track resistant polypropylene with ultraviolet inhibitors.

Material: Body and Keeper GH201D & GO300 Series – Bronze
 Body and Keeper 202AD – Aluminum Alloy
 Eyestem 201D – Bronze Alloy, Forged
 Eyestem 202AD – Aluminum Alloy, Forged
 Spring (on eyestem) – Stainless Steel Belleville

Note: Add "P" su x for tin plating, ex GH201DP
 Add "L" su x for factory loaded inhibitor in main conductor groove, ex. GH201DPL

ALUMINUM
ESC

OVERHEAD PRIMARY TAPS SPRING LOADED “LINE SNAPPER” STIRRUP CLAMPS ALUMINUM

- Two bolt stirrups have clip type springs to apply moderate pressure on the jaws as they are pushed onto the line. This pressure is enough to allow the assembly to support its own weight on the line while one of the eyestems is snugged down.
- Lifting eyes are provided on both jaws and eyestems are standard.
- The angular relationship between stirrup and tightening bolts is an easy approach position for making installation leaving the stirrup hanging straight down.

Material: Castings – Aluminum Alloy
 Stirrups – Copper Rod—Tin Plated
 Eyestems – Bronze Alloy Tin Plated or Stainless Steel
 Spring – Stainless Steel

Note: Factory inhibited and bagged, add “XB”

PEENED THREADS TO

OVERHEAD PRIMARY TAPS STIRRUP CONNECTOR ALUMINUM

ALUMINUM
GA100SL

- GA100S Series Hot Line Stirrup Connector provides a convenient method to install tap connections which must be removed and re-installed frequently.
- Easily installed with standard Hot Stick equipment, and are recommended for uses on aluminum or ACSR run conductors in conjunction with a bronze hot line tap on the stirrup bail.
- Long term performance is assured by the field proven design incorporating, a large connector mass, vise-type interlocking components, and a short low resistance current transfer through a soft, pure aluminum spacer.
- The #2 Sol. hard drawn copper stirrup is positioned for adequate clearance. Additional stirrup sizes are available. Factory loaded with inhibitor

Material: **Body Casting** – Aluminum Alloy
Eyestem – Forged Aluminum

OVERHEAD PRIMARY TAPS STIRRUP CLAMPS ALUMINUM

ALUMINUM
GH280AL

GH280AL Series Aluminum Stirrup Clamps provide a convenient method of making copper connections and taps to ACSR, AAC and AAAC where connections are frequently installed and removed.

- Wide bail con guration provides easy installation for one or two hot-line taps.
- High-strength aluminum alloy body and pressure pad form permanent connection with low contact resistance.
- Forged aluminum eye bolt assures consistency of strength along with compatible thermal expansion/contraction characteristics and corrosion resistance.
- Serrated conductor groove prevents rotation on run conductor.
- Modified parabolic V-groove design encircles the run conductor maximizing contact area and ensuring efficient current transfer.
- Wrought aluminum alloy body provides elongation characteristics for consistent compression to copper stirrup.
- Crimped copper stirrup provides high conductivity to maintain low operating temperature.
- Meets or exceeds all ANSI-C119.4 Class A current cycle requirements.
- Factory inhibited and bagged

Material: **Body & Pad** – Extruded Aluminum
Stirrup – Copper
Eyestem – Forged Aluminum

HEAVY DUTY COMPRESSION STIRRUP TYPE HLS

ALUMINUM
HLS

- For use with Versa-Crimp[®] or standard compression tools.
- Stirrups protect primary lines from arcing damage by allowing hot line clamp connections to be made without contacting the main line. The HLS design offers convenient installation because it can be lifted and placed on the line using the crimping tool jaws as a holding device.
- Wide stance of crimping segments gives good stability when striking bail with a hot line clamp. All sizes have side opening line slots.
- Stirrups can be used on either aluminum or copper lines. Contact grooves are pre filled with electrical joint compound. Individually packaged in poly bags to prevent contamination.

Material: Castings – Aluminum Alloy
Stirrup – Copper Rod—Tin Plated

Refer to page DC-30 & DC-31 for recommended tool and die information.

HIGH VOLTAGE APPLICATIONS—All Aluminum/Copper and Copper Lugs (VCEL, VACL, VHCL, VHCS and VCELC) are rated at 34.5 KV. The other U.L. listed compression connectors (VACS, VACT, VCCT, VHSS and VHS) have a maximum UL voltage requirement of less than 2000 volts, however Anderson recommends these connectors for application through 34.5 KV subject to the manufacturers' limitations and recommendations for the insulation material. For further information, contact factory.

+ TBM-8 Tool ONLY

★ Anderson HC-12 Dies, Burndy's Y-35 Dies and Blackburn's JB-12 Dies are interchangeable.

(1) "VACL" Lug sizes -350 to -500 take 1 less crimp (VC6 Tools) than shown.

(2) Color code is for Anderson and Burndy dies only. Use the recommended die number (NOT die color) for Blackburn, Kearney & T&B Hyd. Tools/Dies.

(3) The "VACL" lugs are qualified for UL "HV" applications.

(4) The "VACS" sleeves and "VACT" tee connectors are for AL to AL or AL to CU connections ONLY. (NOT for CU to CU connections).

* Not UL Listed-pending completion of test.
